## **Mechanics For New Age**

### **Table Of Contents**

---

|                                                               |                 |
|---------------------------------------------------------------|-----------------|
| <b>Chapter I: Introductory Chapter.</b>                       | <b>Page No.</b> |
| (i) Introduction:                                             | Page 2          |
| (ii) Title of the Problem:                                    | Page 4          |
| (iii) Statement of the Problem:                               | Page 4          |
| (iv) Objectives (intention of my writings):                   | Page 4          |
| (v) Research Background:                                      | Page 5          |
| (vi) Statement of Hypothesis:                                 | Page 5          |
| (vii) Research Questions:                                     | Page 6          |
| (viii) Research Methodology:                                  | Page 6          |
| (ix) Conclusion:                                              | Page 6          |
| (x) Bibliography:                                             | Page 7          |
| <br><b>Chapter II: Newton &amp; Classical Mechanics.</b>      |                 |
| Section I: Executive Summary:                                 | Page 7          |
| Section II: Declarations by Mechanics for New Age:            | Page 9          |
| Section III: Simulations:                                     | Page 30         |
| Section IV: Contentions:                                      | Page 50         |
| Section V: Some Elaborations of New Formula:                  | Page 72         |
| Section VI: Beauty of New Formula:                            | Page 81         |
| Section VII: Newton's Book Analysis:                          | Page 85         |
| <br><b>Chapter III: Einstein &amp; Quantum Mechanics.</b>     |                 |
| Section I: Executive Summary:                                 | Page 94         |
| Section II: Declarations by Mechanics for New Age:            | Page 96         |
| Section III: Simulations:                                     | Page 109        |
| Section IV: Contentions:                                      | Page 116        |
| Section V: Problems with Relativity:                          | Page 127        |
| Section VI: Einstein's Book Analysis:                         | Page 144        |
| <br><b>Chapter IV: St Hawking &amp; Creation of Universe.</b> |                 |
| Section I: Executive Summary:                                 | Page 175        |
| Section II: Declarations by Mechanics for New Age:            | Page 176        |
| Section III: Simulations:                                     | Page 190        |
| Section IV: Contentions:                                      | Page 196        |
| Section V: St. Hawking's Book Analysis:                       | Page 212        |
| Section VI: Divine Intervention:                              | Page 306        |
